

YeukYu (Tiffany) Lee

Software Engineer in Web Development

✉ lyeukyu@gmail.com ☎ +1 (646) 321-3377  [in/yeukyulee](https://www.linkedin.com/in/yeukyulee)

Experience

Chegg Inc. | Santa Clara, CA

Software Engineer II

Jan 19 — Present

Commerce Experience Team

As the Scrum Master of the Agile Development Team:

- Leads a team of 8 frontend engineers
- Plans and coordinates scrum team logistics and sprint level tasks
- Facilitates communication across engineering, product, and quality assurance to deliver high-quality product deliverables on time

As a Frontend Developer:

- Creates cross-browser compatible, accessible, and responsive features on various checkout flow in Chegg, leveraging modern web technologies like React/Redux and Next.js etc.
- As an accessibility audit leader, organizes team's effort to improve commerce pages to be 100% AA accessible
- Rewrites checkout in React/Redux, deprecating legacy PHP system
- Uses analytic platforms like Logz.io, Redshift, Sentry, and New Relic to maintaining the stability of Chegg's checkout system, which supports 100k+ visitors daily
